- :: Extensive set of accessories

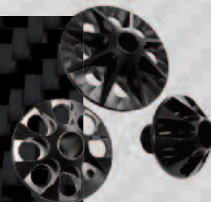

The attractive shipping, storage and operation case

This special case offers you three advantages:

- 1. Easy and safe** storage and shipping. In this light weight robust multi-case, the material is well protected against shock, vibration, dust and rain.
- 2. Compact and mobile.** Pull the handle and roll easily to your remote inspection area.
- 3. Fast and independent.** Just lift the hood and get ready to work out of the box with your VUMAN® system within a few seconds. Battery powered with the micro compressor you can seamlessly reach and solve most remote inspections.

Centering devices that lift your images and speed your pipe inspection

Different diameters securing different pipe dimensions. Your probe will be positioned in the center of the pipe. Not only this devices will avoid you pushing your probe tip through sludge and other debris left on the ground, in combination with the Remote Focus it will give you fast and perfect imagery of pipe walls and orbital welds. Pictures are always shot from same perspective and magnification level, thus inspection and interpretation will become easy and save.

Fiber push rod with perfect pushfixture increases the range of usability

Perfect and easy to attach these useful accessories will ensure controlled manoeuvring and access over even greater distances.

Power battery pack for fast and independent operation

Whether inside a steam generator or an inspection at a remote location, with the field replaceable battery stacked on your system you work fully independently from any power source and air supply. Save time and resources.

Perfect sight and increased use with the 90° side view prism

Simply attach this optic to your probe and enjoy perfect images even in the smallest diameter pipe. This device delivers more value and quality to your inspection results and increases the usability.

Spare lamp for the high power light source included free of charge

Lamps tend to fail when needed most. The lamp of your VUMAN® is easy to replace in field. Have your spare lamp safely in the accessories box at hand when needed. Field replacement is easy.

Back up free of charge

Never loose your biggest value. Thousands of images and hours of film will be securely stored at the additional external hard disk delivered in the kit. The unit is Mil Standard tested to protect your data even under hardest environmental conditions.
